

Various supports out of COMBITUBE

Shootings of bottles and other reflective objects continually take place all over the world. One of the greatest challenges in photography.

FOBA's COMBITUBE™ System* is the perfect tool for it. Thanks to the many plates and holders of various sizes you always got the right support at hand for the subsequent shot.

With the telescopic upright STAPI ...

modelling
clay ...

... and the wine
bottle as
shooting object

... or with
COMBITUBE

Various supports from the COMBITUBE™ System

The right support for any object of any size: no more annoying reflections from underneath whilst shooting bottles or other reflective objects.

COMBITUBE
